

Innovative and Inclusive Democratic Spaces for Deliberation and Participation

iDEM project aims to break these linguistic barriers and begin a new era of **inclusive and participatory democratic spaces** with the help of artificial intelligence.

Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. Neither the European Union nor the granting authority can be held responsible for them.

Funded by
the European Union

iDEM project will provide...

Deep analysis of Language complexity barriers in participatory democratic spaces, **to identify users' needs and the reasons behind their difficulties** in understanding information on public matters.

Artificial Intelligence tools that **simplify and make information more understandable** to participate in the democratic debate, aimed at people with communication difficulties or intellectual disabilities.

Develop and implement four use cases in different languages, with a deliberative approach and gender perspective, engaging groups who experience exclusion from democratic processes or spaces, due to language barriers related to the complexity of language.

Discover the use cases

In order to test the new iDEM democratic spaces four use cases will be co-created and developed in four cities with our organizations working for the rights of the user groups, NGOs, and government institutions committed to democracy and human rights.
